## **DETAILED ACTION**

Claims 1-2, 5, 7-8, 11, and 13-14 are pending.

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 13, 2005 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-2, 5, 7-8, 11, and 13-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The independent claims employ improper alternative language in defining the R groups of the formulae. More specifically, the claims employ open language "comprising". It is unclear what are the metes and bounds of the claimed groups and the unspecified species. See as an example, the claim 1 definition of R<sub>9</sub> and R<sub>11</sub>.

The dependent claims are included since they do not correct the issue with these limitations and thus incorporate them.

***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-2, 5, 7-8, 11, and 13-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 and 13-15 of U.S. Patent No. 6,403,183 in view of Marwitz et al, US 3,671,485. Although the conflicting claims are not identical, they are not patentably distinct from each other because said claims differ in the substrate treated and the prior art recognizes the treatment of said substrates interchangeably for the food packaging art.

6,403,183 discloses and claims (claims) a transparent article comprising a cellophane substrate coated on at least one surface with the instantly claimed coating compositions. 6,403,183 differs in the substrate being coated.

Marwitz et al (column 1, lines 1 et seq) discloses silane based coatings for treating paper and films among other substrates for food packaging. Marwitz et al (column 4, lines 7-20) teaches a number of materials to be treated include paper, fibers, foil sheet, wood and organic plastics.

These references are combinable because they teach treatment of food packaging with silane based compositions and Marwitz et al is cited on the 6,403,183 as prior art. It would have been obvious to one of ordinary skilled in the art at the time of applicants' invention to employ the compositions of 6,403,183 for treatment of the fiber and paper food packaging as an prior art recognized substrate used in food packaging.

***Response to Arguments***

6. Applicant's arguments filed June 13, 2005 have been fully considered but they are not persuasive.
7. Applicants (page 12) assert the Marwitz et al claims do not disclose or suggest the relative concentrations of the instant claims. This has not been deemed persuasive since the compounds of formula (2) in Marwitz et al is an optional component. Looking to the specification to see what the Marwitz et al claims, which are generic to said limitation include within said generic claim and what Marwitz et al intends as the meaning of optional in the claims, Marwitz et al sets forth (column 7, lines 15-27) that the (10 is employed at greater than 50 % by weight.
